SEISDON RURAL DISTRICT COUNCIL

PUBLIC HEALTH DEPARTMENT

ANNUAL REPORTS

FOR

1950

A. P.--Try, M.B., B.S.,  
Medical Officer of Health

G. V. R. Loo, M.R.San.I, M.S.I.A.,  
Chief Sanitary Inspector

## SEISDON RURAL DISTRICT COUNCIL

Annual Report of the Medical Officer of Health for the year 1950.

To the Chairman and Members of the Seisdon Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present to you my Annual Report for the year 1950.

The health of the District has remained satisfactory except that, common with the rest of the country, during the summer poliomyelitis cases were more numerous than usual and in the late autumn influenza and pneumonia caused a considerable number of deaths among the aged,

During the year a careful survey was made of all houses adjacent to a main sewer the closets of which were unconnected therewith. Month by month a number of these pail closets were converted into water closets and connected with the sewers.

The Ministry's sanction has not yet been received for permission to proceed with the construction of sewage disposal works at Pattingham.

I should like to thank you Mr. Chairman and the Members of the Council, also the Clerk and other Council Officials especially the Public Health Department Staff for kindness and help during the time I have acted as your Medical Officer.

I have the honour to be,

Your obedient servant,

A. P. FRY.

Medical Officer of Health.

August, 1951.

1946	10	20	30

NOTES FROM VITAL STATISTICS:

Births: Births numbered 339, a slight fall from the 1949 figure of 349.

Deaths: The total was 202, in 1949 it was 212. Chief causes of death were as follows:-

Heart Diseases	65
Cancer	29
Apoplexy	25
Bronchitis	10

Infantile Mortality:

Seven deaths occurred under 1 year of age, of these 5 were premature babies, 1 had congenital deformity, and the other died from an accident.

## SECTION B.

### Water Supply:

The water supply of the District is mainly furnished by four water undertakings.

1. Wolverhampton Corporation Water Undertaking supplies the Parishes of Codsall, Wrottesley Detached, Pattingham and Lower Penn. 244 bacteriological analyses were made of water before treatment and 883 analyses of treated water going into supply. Of these 883, 876 contained no B.Coli, the other 7 contained a few Coliform bacilli but none of the Faecal Coli Type 1.
2. Bilston Corporation Water Undertaking supplies Wombourn, Trysull, Scisdon, Himley and Swindon. 5 samples were taken for bacteriological examination and found to be satisfactory. The water is obtained from deep wells and chlorination is applied continuously. This water is satisfactory.
3. South Staffordshire Waterworks Company supplies Kinver, Envillo and Bobbington. 445 samples were taken and all found to be free of coliform bacilli.
4. City of Birmingham Water Department supplies the Iwerley portion of Kinver. Bacteriological examinations were made fortnightly. 12 samples were free from coliform bacilli, 10 contained from 2-9 B.Coli Type 1 per 100c.c.

The chemical analyses of all the above mentioned Water Undertakings are satisfactory.

## SECTION C.

### General Provisions of Health Services.

Infectious Diseases The Infectious Diseases hospitals are under the control of the Birmingham Regional Hospital Board.

The arrangements for admission of cases continue as before; a general practitioner, who considers that his patient should be sent to hospital, notifies me and I arrange it with Moxley Hospital.

### Ambulance Facilities

(a) Infectious Diseases the Ambulance Service is provided by the Birmingham Regional Hospital Board.

(b) Non-Infectious Diseases the Staffordshire County Council provide the ambulances, one is stationed at Tettonhall to serve the northern part of the district and the other is stationed at Brierley Hill for the southern part. After 6p.m. the Brierley Hill Ambulance serves the whole District.

### Infant Welfare Facilities

The County Council maintains five Infant Welfare Centres in the District:-

Men's Institute, Wombourn ..	alternate Monday afternoon
Trysull School .....	alternate Monday afternoon
Free Church School, Codsall.	Tuesday afternoon
Bobbington School .....	second Wednesday afternoon each month.
Constitutional Club, Kinver	Friday afternoon.

# SEISDON RURAL DISTRICT COUNCIL

## ANNUAL REPORT

of the

## CHIEF SANITARY INSPECTOR

Year 1950

To the Chairman and Members, Seisdon Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to submit my tenth Annual Report, that for the year 1950, upon the work performed by my department.

I should like to express my sincere thanks to the Chairman and Members of the Council for their help and consideration in the carrying out of my duties; to the Medical Officer of Health and other officials of your Council for their help, and to Mr. Nally and Mr. Robinson for their unfailing and willing assistance at all times.

1.

### 3.

## COMPLAINTS

One thousand and forty five complaints were received during the year under review. They concerned the following defects:

Housing Defects	...	112	Refuse collection	...	137
Water Supply	...	1	Rats	...	44
Overflowing cesspools	...	645	Drainage defects	...	106

The complaints were distributed amongst the parishes as follows:-

Bobbington - 49	Codsall - 132	Wombourn - 261
Kinver - 126	Lower Penn - 155	Himley - 17
Seisdon - 105	Swindon - 42	Enville - 27
Wrottesley - 72	Pattingham - 59	

4.

#### INFECTIOUS DISEASES

Routine disinfection of rooms etc. occupied by cases of scarlet fever and diptheria, was carried out; disinfection after cases of tuberculosis, cancer etc. was undertaken at the request of relatives. The method of disinfection is that of formaldehyde, either by stoving or in spray form.

Rooms disinfected ... .. 23

5.

#### SLAUGHTERHOUSES

There are eight private slaughterhouses in your Area: these have not been in use since the operation of the Government Meat and Livestock Scheme, January 1940, except in two cases, occasionally for the slaughter of home fed pigs.

6.

#### ICE CREAM

During the summer of 1950 some intensive work was put into the inspection of premises and sampling of ice cream. 259 visits were paid to the 43 premises at that time storing and selling ice cream.

During the course of these visits 80 tests were made to ensure that the temperature requirements of the Ice Cream Regulations (i.e. the product must be kept at a temperature below 28° Fah.) were being observed. In every case the conditions were satisfactory

84 samples were taken for bacteriological examination. The results were as follows:

Grade:	<u>1.</u>	<u>2.</u>	<u>3.</u>	<u>4.</u>	<u>Total</u>
	38	27	11	8	84

The Laboratory suggestions as to quality are given below:

"Owing to the numerous factors governing the hygienic quality of ice-cream it is unwise to pay too much attention to the bacteriological results on any single sample. Judgment should be based rather on a series of samples. It is suggested that over a six-monthly period, 50 per cent of a vendor's samples should fall into Grade 1, 80 per cent into Grades 1 or 2, not more than 20 per cent into Grade 3, and none into Grade 4."

In view of the above statement it will be clear that the season's work shews a reasonably satisfactory state of affairs, particularly in relation to Grades 1 and 2.

I am pleased to say that, possibly as a result of our representations, there has been, so far in 1951, a considerable improvement in the twelve samples purchased from Manufacturer I, the figures (in 1951) for this firm being:

Grade 1 - 6

Grade 2 - 5

Grade 3 - 0

Grade 4 - 1

Manufacturers K and Q have again this year (1951) maintained their high standards.

Analysed, the results were:

Manufacturer	No. of Retailers selling in this area	Grade				Total
		1.	2.	3.	4.	
A	1	1				1
B	2	3	3		1	7
C	1	1	2			3
D	1				1	1
E	1	1		1	1	3
F	1		2	2	1	5

K	14	11	4			15
L	1			1		1
M	1	3	1	1	1	6
N	1		1		1	2
O	2	3				3
P	1	1				1
Q	5	12	2			14
17	43	38	27	11	8	84

7.

#### MEAT AND FOOD INSPECTION

A total of 158 visits were made in connection with the inspection of meat and other foods; 87 were made during the daytime and 71 were made in the evening or at the week-end.

The following items were, after inspection, found to be unsound, unwholesome or unfit for human consumption:

2lb. cheese  
 2lb. margarine  
 6lb. flour  
 3½ lb. chocolate  
 15 x 16oz. Tins Chopped Pork  
 1 x 20oz. Tin Plums  
 1 x 15½oz. Tin Peas.

Approximate weight: 31 lbs.

MILK SAMPLING

Milk Sampling is undertaken by County Public Health Staff and the following table gives the results as supplied by the Laboratory:

Bacteriological

	<u>Total</u>	<u>Satisfactory</u>	<u>Unsatisfactory</u>
Undesignated	66	43	23
Sterilised	11	11	-
Accredited	2	2	-
T.T.	5	3	2
Pasteurised	19	19	-
T.T. "	10	10	-
	<u>113</u>	<u>88</u>	<u>25</u>

Biological for T.B.

	<u>Total</u>	<u>Negative</u>	<u>Positive</u>
Accredited	2	2	-
Undesignated	53	53	-
T.T.	21	19	2
Pasteurised	6	6	-
	<u>82</u>	<u>80</u>	<u>2</u>

We were notified of eight samples which were positive for Brucella Abortus. These cases were investigated by your Medical Officer of Health.

We were not informed of the total taken for examination for Brucella Abortus but I understand that generally all samples taken for T.B. examination are also examined for Brucella Abortus.

9.

### WATER SAMPLING

During the year 17 samples of water were taken, 8 for bacteriological examination and 9 for chemical.

1 Bacteriological and 7 chemical samples were reported upon as being satisfactory. The unsatisfactory samples were obtained at wells in connection with 20 cottages in various parts of the district. All have, or schemes are in hand, now been provided with mains water.

10.

### HOUSING

132 notices were served during the year. These were sited as follows:-

	INF.	STAT.		INF.	STAT.
Bobbington	1	5	Wombourn	21	32
Seisdon	-	1	Kinver	17	11
Codsall	4	2	Himley	5	2
Pattingham	-	7	Lower Penn	3	-
Swindon	1	8	Wrottesley	9	3

The notices referred to the Housing and Public Health defects enumerated on pages 17 and 18.

11.

### VERMINOUS PREMISES AND PERSONS

Three visits were made during the year to premises stated to be verminous or dirty. The following disinfections took place:-

Rooms infected with bugs: 4

Spraying with an insecticide incorporating D.D.P. was the means of treatment adopted, the operations being successful.

On a number of occasions requests were received to carry out treatment of bedrooms at National Service Hostels. These were treated with D.D.T. Generators successfully.

## DEFECTS - EXTERNAL

As noted in Part 1 of my report, 113 notices were complied with during the year concerning the housing repairs noted on Pages 15 and 16.

The premises concerned were sited as follows:-

Bobbington	5	Kinver	17
Lower Penn	3	Pattingham	6
Scisdon and Trysull	2	Swindon	14
Wombourn	52	Wrottesley	11
Codsall	3		

16.

## MOVEABLE DWELLINGS

Work under this heading has continued throughout the year. As will be noted on Page 9 of this report 1,116 visits were made to individual moveable dwellings and 16 to Camping Grounds. The standard of the majority of these sites has very greatly improved during the past two or three years. Active co-operation is maintained with the Planning Officers with fruitful results. It is difficult to give an accurate figure of the number of individual moveable dwellings in the District but it is believed to be in the neighbourhood of 325.

It is now the policy of the Council to restrict licensing under Section 269 Public Health Act, 1936, to genuine trailer-caravans and tents. Sectional buildings and huts etc. are now dealt with under Section 53, Public Health Act, 1936, buildings constructed of short-lived materials.

# FACTORIES ACT, 1937 & 1948

This table is enclosed by request of the Ministry of Labour and National Service to indicate to Medical Officers of Health the prescribed particulars which are required by Section 128 (3) to be furnished in their annual reports with respect to matters under Part I and Part VIII of the Act which are administered by the District Council.
